SUMMARY

I enjoy solving problems creatively regardless of the scope, and for the past 12 years of my career, this has meant developing software solutions in various roles across all stages of the development lifecycle: I've written web fullstack, desktop and mobile code, documentation, user stories, tests and prompts; I've led teams, managed scrum ceremonies including plannings & refinements; I've supported and modernized legacy solutions and started projects from scratch; I've worked closely with clients and product teams distilling requirements, with user experience designers iterating over ideas and bridging the gap between QA and Operations/support teams. I'm always learning something and lately I've been harnessing AI more and more as a learning coach. Speaking of IA: I'm still on the process of tweaking models and testing utilities to see what's best for a 100%-local workflow, currently my stack is lean: ollama running gemma4/deepseek-r1 controlled with a python script I'm developing as an exercise rather than just consuming one of the many existing agentic wrappers.

TECHNICAL SKILLS

Languages: C# · Python · SQL · JavaScript · TypeScript · HTML · CSS / SCSS

Frontend: React · Angular · Blazor (Razor) · Xamarin · Bootstrap · PWA / SPA patterns

Backend: Django · Django REST Framework · Node.js · ASP.NET (& .Net up to 8) · REST · GraphQL · SOAP

Databases: MS SQL Server · MySQL · SQLite · MongoDB · CosmosDB

Infrastructure & Tooling: Azure (App Services, Functions, Queues, Blobs, CosmosDB) · Docker · Linux VPS · Git · CI/CD · Postman

Engineering Leadership: Conflict resolution · Team leadership & mentoring · Hiring & technical interviewing · Remote & multicultural team management

Practices: TDD · Agile/Scrum · Code review · Technical documentation · Process documentation & Improvement · Stakeholder interviews · Sprint planning & prioritization

PROFESSIONAL EXPERIENCE

Engineering Manager / Team Lead · [Hitachi Energy](#) · Barcelona, Spain | Sep 2024 – Dec 2025

Led one of two distributed teams (10 devs each) maintaining and expanding the Digital Passport System — a component-traceability and MES platform for high-voltage equipment manufacturing and servicing, used across global HE factories and suppliers.

- Coordinated releases, hotfixes, and sprint ceremonies across a fully remote, multicultural team.
- Documented and evolved the processes and practices followed by teams across the project.
- Worked closely with product, business, and external integration partners to align priorities and ship incrementally.
- Conducted technical interviews, 1:1s, and performance reviews; resolved team conflicts with a focus on empathy and compromise.

Senior Full-Stack Developer (.NET / Blazor) · [KopiusTech](#) → [HCHB](#) · Remote | Apr 2023 – Jul 2024

Developed the first module of a Blazor + Piral micro-frontend application to replace a legacy enterprise system for a major US healthcare client.

- Built new components and features end-to-end using TDD within a CI/CD pipeline.
- Identified requirement gaps early, collaborating with POs, UX, QA, and architects to prevent rework.
- Wrote SQL data-setup scripts for automated integration tests; authored technical docs for undocumented modules.
- Presented an internal webinar (Blazor: "Straight to the meat") and performed technical screening interviews.

Senior Backend Developer (.NET / Azure) · [Svitla](#) → [ASA Financial](#) · Remote | Jul 2022 – Mar 2023

- Built serverless Azure Functions integrating third-party financial systems; standardized API interfaces across solutions.
- Documented existing architecture and business logic — reducing onboarding friction and surfacing improvement areas.

Senior Full-Stack Developer (React / .NET) · CloudX · Remote | Jul 2021 – May 2022

Maintained multiple client projects across industries — most with C# REST backends and React (JS / TypeScript) frontends.

- Worked across relational and NoSQL databases; contributed to SonarQube-gated quality pipelines.

Independent Senior Developer (multi stack) · ThinkerSys → IRC · Remote | Jul 2018 – Jun 2021

The International Rescue Committee. Sole developer and technical analyst on several web applications from zero to production, here I had to hit the ground running while learning and developing applications with technologies I hadn't used before, namely Azure Functions, Queue-based distributed systems, Python/Django, React, Node.js and Linux servers.

- Built multiple Python/Django web apps from scratch, some as React SPAs with PWA capabilities.
- Gathered requirements directly from stakeholders and translated them into user stories and actionable tasks.
- Developed and maintained Azure Functions integrating Twilio, Salesforce, SendGrid, Contentful, ZenDesk, and cVent via queues and NoSQL.
- Performed complex SQL schema migrations; managed deployments on Linux VMs and Azure App Services.

Tech/Team Lead & .NET Developer · Globant → Deloitte · Rosario, Argentina | Mar 2017 – Jul 2018

- Led a team of 12 building a Xamarin iOS/Android + backend app from scratch; also led a team of 4 maintaining a separate inherited enterprise project with the same stack.

Software Developer · Accenture → CIO (Internal) · Rosario, Argentina | Mar 2014 – Feb 2017

- Evolved from “Software Engineering Associate” to “SE Analyst” while developing a complex enterprise financial forecasting system (VB.Net → C#, SQL, HTML+JS); automated team pain-points by developing internal tools including a Visual Studio extension.

EDUCATION

Information Systems Engineering (undergraduate, coursework completed, degree not pursued) ·
Universidad Tecnológica Nacional, Rosario · 2006–2013

Personal & Professional Computing Technician · Complejo Educativo Dr. Francisco de Gurruchaga ·
2003–2005

LANGUAGES & OTHER

Spanish (native) · **English** (bilingual) · **Japanese** (JLPT N4) · **Catalan** (beginner)

Legal status: Spanish resident (NIE + NUSS); dual Argentine/Italian citizenship; valid passports for both.

Outside work: 2-dan KENDŌ, 1-dan IAIDŌ and 1kyuu JŌDŌ practitioner; founder and former instructor at Rosario Budokan dojo; EN/ES interpreter for international seminars and translator for several projects; hobbyist game developer; fiction writer (yet to publish); dad; current deep-dive interests: electromagnetism, plasma physics, CAD & simulation software, agentic AI systems, and miscellaneous programming languages and frameworks.
