PROFILE

Staff-level Software Engineer with 10+ years of experience designing, stabilizing, and evolving complex backend and full-stack systems in enterprise and regulated environments. Strong background in .NET and cloud-native platforms, with a focus on system reliability, integration-heavy architectures, developer enablement, and cross-team technical leadership. Known for bringing clarity to inherited systems and reducing delivery risk through documentation, standards, and pragmatic technical decisions.

TECHNICAL FOCUS AREAS

- Platform & backend systems (.NET, APIs, cloud services)
- Legacy system stabilization and modernization
- Cross-team technical alignment and enablement
- Integration-heavy and distributed systems
- Developer productivity, CI/CD, and operational readiness

CORE TECHNICAL SKILLS

Backend & Platform Engineering

- C# / .NET (Framework, Core, .NET 6–8)
- Backend API development (REST, GraphQL, SOAP)
- Asynchronous & reactive programming (async/await, [Rx.NET](#))

- Azure cloud services (App Services, Functions, Queues, CosmosDB)
- SQL & data modeling (SQL Server, MySQL, SQLite)
- NoSQL databases (MongoDB, CosmosDB)

System Quality & Delivery

- CI/CD pipelines (Azure DevOps)
- Testing & quality practices (TDD, xUnit, Moq, bUnit)
- Observability, debugging, and production support
- Performance and reliability considerations
- Security fundamentals (API auth, data handling)

Frontend & Integration Context

- Blazor, React, Angular
- Micro-frontend architectures (Piral)
- Node.js & Python (Django / DRF)
- Third-party integrations and event-driven workflows

TECHNICAL LEADERSHIP (IC-FOCUSED)

- Technical ownership without formal authority
- Cross-team coordination on shared systems
- Mentoring and technical guidance
- Architecture and system documentation
- Standards definition and knowledge sharing
- Technical risk identification and mitigation

PROFESSIONAL EXPERIENCE

Hitachi Energy — Barcelona, Spain

Technical Team Leader

Sep 2024 – Dec 2025

- Took technical ownership of a mission-critical manufacturing traceability platform with multiple integrations and global usage.

- Gained deep understanding of a complex, inherited system and its dependencies, becoming a go-to technical reference.
- Improved system reliability and delivery predictability through documentation, prioritization, and coordination of technical work.
- Supported release planning, hotfixes, and operational issues while staying hands-on with backend code.
- Collaborated closely with product, service, and business teams to clarify requirements and technical constraints.

KopiusTech — Remote

Senior / Staff Software Engineer (Platform & Enablement Focus)

Apr 2023 – Aug 2024

- Led development of the first module of a Blazor-based micro-frontend platform intended to replace a legacy enterprise application.
- Acted as a technical reference point across teams, helping align implementation details and integration boundaries.
- Emphasized maintainability and future extensibility through documentation and shared patterns.
- Worked closely with Product Owners to identify requirement gaps and anticipate technical risks.
- Contributed to CI/CD pipelines and test strategy within a TDD-driven environment.

Svitla — Remote

Senior Backend Engineer

Jul 2022 – Mar 2023

- Contributed to a regulated financial platform built on Azure serverless infrastructure.
- Focused on API consistency, system documentation, and technical debt reduction.
- Proposed improvements to stabilize and standardize backend services.

CloudX — Remote

Senior Full-Stack Engineer

Jul 2021 – May 2022

- Worked across multiple projects with shared backend platforms and frontend applications.
- Contributed to both REST APIs and frontend integrations using React and Angular.
- Collaborated across teams to ensure consistency and smooth transitions between deployments.

ThinkerSys — Argentina / Remote

Senior Software Engineer (Independent Contractor)

Jul 2018 – Jun 2021

- Developed and maintained multiple systems for a large international NGO.
- Built backend services and integrations using Python/Django and Azure Functions.
- Performed complex SQL migrations and system integrations.
- Managed deployments and operational aspects of production systems.
- Frequently worked on inherited systems requiring stabilization and incremental improvement.

Earlier Experience (Summary)

- **Globant:** Xamarin Technical Lead and Senior Developer.
- **Accenture:** Software Engineering Analyst / Associate on large enterprise systems.
- **Freelance:** Web development and IT solutions for small businesses.

EDUCATION

- **Information Systems Engineering (coursework completed, degree not pursued)**
Universidad Tecnológica Nacional — Argentina
- **Information Technology Professional**
Complejo Ed. Dr. Francisco de Gurruchaga - Argentina

LANGUAGES

- Spanish (Native)
- English (Bilingual)
- Japanese (Basic)
