PROFILE

Software Engineering Manager with 10+ years in professional software development and recent hands-on experience leading distributed, multicultural teams in enterprise environments. Strong technical background in .NET and cloud-based systems, combined with a pragmatic, people-first leadership style. Proven track record stabilizing inherited systems, improving delivery processes, and aligning engineering execution with business priorities.

CORE SKILLS

Engineering Leadership

- Team leadership & mentoring
- Line management (1:1s, performance reviews)
- Hiring & technical interviewing
- Conflict resolution
- Remote & multicultural team management

Delivery & Process

- Agile / Scrum execution
- Sprint planning & prioritization
- Release & hotfix coordination
- Risk management
- Process documentation & improvement

Technical Background

- C# / .NET (Framework 2-4.5, Core, .NET 6-8)
 - Backend APIs (REST, GraphQL)
 - Azure (App Services, Functions, Queues, CosmosDB)
 - SQL (SQL Server, MySQL)
 - CI/CD (Azure DevOps)
-

PROFESSIONAL EXPERIENCE

Hitachi Energy — Barcelona, Spain

Software Engineering Manager / Team Leader

Sep 2024 – Dec 2025

- Led a multicultural and distributed, mostly-remote full-stack team maintaining and extending a mission-critical manufacturing traceability system.
 - Conducted regular 1:1s, performance follow-ups, and resolved interpersonal and delivery conflicts.
 - Coordinated sprint planning, prioritization, regular releases, and hotfix deployments.
 - Acted as primary engineering point of contact for product, service, and business stakeholders.
 - Documented existing development processes and incrementally improved team execution and predictability.
-

KopiusTech — Remote

Senior Full-Stack Developer (Technical Lead responsibilities)

Apr 2023 – Aug 2024

- Acted as de-facto technical lead for a Blazor micro-frontend initiative replacing a legacy enterprise system.
 - Coordinated work across multiple teams and initiatives to avoid duplication and deployment conflicts.
 - Worked closely with Product Owners to clarify requirements and anticipate technical risks.
 - Produced extensive technical and onboarding documentation to reduce team dependency on tribal knowledge.
 - Participated in technical interviews and internal training initiatives.
-

Svitla — Remote

Senior .NET Backend Developer

Jul 2022 – Mar 2023

- Contributed to a regulated financial platform built on Azure serverless technologies.
 - Improved API consistency and documented system behavior and business logic.
 - Collaborated closely with cross-functional stakeholders to stabilize early-stage platform components.
-

Earlier Experience (Summary)

- **CloudX (2021–2022):** Full-stack development across multiple client projects.
 - **ThinkerSys (2018–2021):** Independent senior developer for NGO and enterprise systems.
 - **Globant (2017–2018):** Xamarin Technical / Team Lead.
 - **Accenture (2014–2017):** Software Engineering Analyst / Associate.
-

EDUCATION

Information Systems Engineering (coursework completed, degree not pursued)

Universidad Tecnológica Nacional — Argentina

Information Technology Professional Complejo Ed. Dr. Francisco de Gurruchaga - Argentina
